

**Providing  
Your  
Complete  
Corrugating  
Solutions**

## **Rapid Flow Flexible Interior Starch Silos:**

- 30,000 lb to 110,000 lb capacities
- OSHA compliant for interior use
- Integrated screw or vacuum transfer system
- Lower installation and shipping costs
- Optional mass-controlled PLC and load cells

## **Rapid Flow Rigid Exterior Starch Silos:**

- 80,000 lb to 250,000 lb capacities
- Air or screw conveying systems
- Enamel-coated welded carbon steel tank
- Level sensors with high level shut off
- Explosion proof lid with securing cables

## **Rapid Flow Super Sack Bulk Starch System:**

- Low cost bulk starch solution
- pneumatic vacuum or
- Screw delivery
- Enamel carbon steel construction
- Optional air hoist and trolley optional load cells

## **RapidBond Caustic Tanks**

- Double-walled or retaining wall
- Heated and insulated
- Agitator system
- Dedicated poly-pro delivery pump

## Starch Storage Systems

### Stainless Steel Storage Tanks:

- 1,000 - 2,000 gallon stainless steel tanks
- Temperature viscosity control (TVC) system
- Pneumatic valve and piping system
- Level sensors for automatic batching

## Dosers and Run Tanks

### Stainless Steel Run Tanks:

- Jacketed stainless steel tanks
- Agitator system
- Dedicated PLC
- Heat and chiller capabilities
- Resin dosing Capability

### Automatic Dosing System:

- PLC controlled
- Stainless steel construction
- Optional resin load cell system

## Loops and Pumps

### Loop Engineering, Design and Installation:

#### Insulated piping engineered for rapid drain

- Standard black iron sch. 40
- Optional stainless steel
- Double diaphragm air pump

### Viking pumps (any variety and capability)

- Mechanical pump
